Mission & Vision

Mission: To let everybody - no matter their skill level - create scalable software **faster, easier, and without hardware dependencies.** Focus on the idea, not the solution.

Vision: The first **cloud IDE** that understands and improves your code like a **human peer.**

The Problem: **\$60B in Lost Productivity**

01

Software development is **slow, error-prone, and expensive**.

02

Developers spend around **42%** of their time **debugging code**.

03

Debugging inefficiencies contribute to over **\$60B** in annual productivity losses

The Solution: Synthi - The AI-Powered Cloud IDE

Synthi is an AI-powered cloud IDE that detects, fixes, and optimizes code in real-time.

01

AI-Powered Automation

Real-time code analysis, automated refactoring, and context-aware debugging.

02

Cloud-Native & Scalable

Unlimited scalability, real-time collaboration, and cloud-scale compilation

03

Zero Setup

Seamless integration with GitHub, GitLab, Bitbucket, and Slack.

25% reduce in debugging time & developer velocity increased by 15%
